Black display cooler to showcase your products

The SCU1425H display cooler in black is all about displaying the products inside. The clever LED interior lighting is set into the door frame and illuminate the products from the front (one vertical strip down each side and one horizontal across the top). The black finish emphasizes the product in the cabinet making it stand out, drawing the eye to what is inside the fridge. Fan assisted cooling ensure even cooling over the whole cabinet and a faster pull-down time when re-stocked. This really is the display cooler to make your product stand out from the rest.
