

TD50A

Minibar Drawer

Product Features

- Compressor operated cooling system
- Low energy consumption
- Low noise operation
- SLEEP-mode function for silence period
- Great product presentation
- LED interior light

Extra drawer for easy overview

Display with a button for each feature

Minibar drawer with low energy consumption

The TD minibar drawer is a great choice for hotel rooms. It has a low energy consumption, which helps keep running costs down. The minibar cooler has an efficient and low-noise compressor operated cooling system. The compressor operated cooling system is a must for warmer surroundings, as they secure a lower temperature level as well as a shorter pull-down time compared to absorption operated minibars.

The drawer design gives a great overview of the content, so guests can quickly find the snacks or cold beverages, they are looking for. It even has a small pull-out drawer within, for e.g. small chocolates and bottles. Fit the minibar drawer into for example a nightstand and offer your hotel guests easy access to all their favorite snacks and beverages. If you want it fully integrated into your décor, we also offer a model without a front/handle.
