Energy-efficient backbar cooler

This new range of DB backbars is highly energy efficient and uses in average 56% less energy compared to the previous models from the same range. This backbar has ventilated cooling for a short pull-down time to ensure that you can keep up with customer demand for cold beverages. The temperature is easily adjusted on the electronic thermostat.

The backbar cooler has hinged doors with double glazed tempered glass, which gives a nice product presentation. The adjustable wire shelves have a white plastic coating for easy maintenance. The backbar is ideal for busy bar environments, and with its black exterior and stucco aluminium interior it has a contemporary look. A great choice for any bar.

The DB range is also available in a variant with self-closing sliding doors.
