

KBAK104

Chest Bottle Cooler

Product Features

- Low energy consumption
- Impressive storage space
- Removable top for easy loading
- Ideal for storing beer and soft drink crates
- Flat sliding solid lids
- Solid castors
- Static cooling

Strong castors

Spacious chest cooler for beverages

This KBAK chest bottle cooler is extremely spacious, as the compressor compartment is placed below the cooling area rather than build into the side of the unit. This means that you can place several crates of beer or soft drinks directly on the bottom of the unit and stack them. Solid sliding lids provides easy access to the contents.

The KBAK chest cooler offers a perfect cooling solution for busy bars, venues, festivals, and events. It is even possible to take off the lids and stack the coolers, when they are not running. This is very practical if you only need the coolers running during events and otherwise stored away.

Also available in a model with large castors for even greater mobility.

Design and Material		Measures and Content		Power and Consumption		
Lid No & Type	2 solid sliding lids	Temperature Range	°C	+1 to +8	Energy Class	B
Castors	Wheels	Climate Class		4	Energy Consumption	kWh/24h 0.54
Exterior Finish	White	Gross / Net Weight	kg	70 / 60	Annual Energy Cons.	kWh/year 198
Interior Finish	White	Gross / Net Volume	l	250 / 226	Input Power	W 190
Interior Light	No	Cooling and Functions			Voltage / Frequency	V/Hz 220-240/50
